

Project SAVE (Scheduling Assistance for Vaccine Equity)

In an effort to address health equity in the COVID-19 vaccine rollout in San Diego, the County of San Diego, in partnership with local government entities and trusted community partners, has increased access to vaccines by implementing a dedicated appointment system for populations at higher risk for contracting COVID-19.

Project SAVE provides Community Health Workers (CHWs) daily three-hour blocks of COVID-19 vaccine appointments to help schedule eligible individuals at several County-operated South Bay vaccination sites. Access to no-appointment sites may also be available for referral.

Eligible Zip Codes in County of San Diego District 1

91902, 91910, 91911, 91913, 91914, 91915, 91932, 91950, 92102, 92113, 92118, 92135, 92139, 92154, 92155, 92173

Vaccine Appointment System

To schedule the dedicated appointments, Promotores and Community Health Workers will have direct access to the designated three-hour block of appointments for each site, not available to the public.

Promotores and CHWs will schedule appointments for eligible residents of priority, high-risk communities through events (e.g. food distributions) and other outreach efforts they are already engaged in.

Promotores and Community Health Workers

Recognizing the historic inequities in populations disproportionately affected by health disparities, outreach and promotion efforts includes utilizing the County's existing network of Promotores and Community Health Workers who have shared backgrounds and experiences with the South Bay community to assist individuals in scheduling vaccination appointments.

Existing outreach efforts include

- Distributing & developing linguistically and culturally appropriate materials
- Addressing COVID-19 questions and concerns, including vaccine hesitancy
- Providing virtual community engagement events and doing in-person outreach at locations frequented by the focus community
- Scheduling appointments and/or accompanying individuals to their appointments

Additional Vaccine Options

Project SAVE currently focuses on South Bay communities with a goal to expand to other regions of the county in the near future. Vaccine [eligible](#) individuals living outside of the South Bay can visit coronavirus-sd.com/vaccine to schedule an appointment at a site near them.

Those 65 years of age and older without computer access can call 2-1-1 for appointment assistance.
